

# “TOP TECHNICIAN TRAINING”

## *Diagnostic Techniques You Can Duplicate*

Presented By

Our instructors teach the best methods to help make good diagnostic decisions and fix vehicles faster! Every class offers real-world experience from vehicles we have fixed.

We're all about helping technicians fix vehicles faster in 4 steps:

- Learn how the system works.
- Learn about the best testing techniques for the system.
- See how to perform the tests.
- Learn what good test results are and where to go next.

Our training classes are written and delivered by John Thornton and Eric Ziegler.

We will help you fix vehicles easier & faster. Guaranteed satisfaction!

### **Topics & Dates for Naperville, IL**

VW Variable Cam Timing Diagnosed w/o Disassembly	Tuesday April 22, 2014
Part II Keyless Ignition Systems for Ford & GM	Tuesday July 22, 2014
Part III Chrysler New Technologies for Engine Mgt Systems	Tuesday September 23, 2014
Part II Essential Diagnostic Techniques By Eric Ziegler	Tuesday November 25, 2014
Domestic Vehicle Low Speed Bus Diagnostic Strategies	Tuesday January 20, 2014
Part III Asian Vehicle Diagnostic Strategies	Tuesday March 24, 2015

**“TOP TECHNICIAN TRAINING” presented by AUTOMOTIVE SEMINARS, INC.**

**Seminar Descriptions, Registration Form, and Pricing for Naperville, IL:**

**1) VW Variable Cam Timing Diagnosed w/o Disassembly**

**Tuesday April 22, 2014**

VW has three different variable timing systems we'll discuss in this class. Using scan data these systems can be diagnosed without disassembly. See which scan data you must use and learn what it is telling you. Learn necessary first scan tool steps to make decisions correctly. Separate mechanical problems from electrical problems. See how to use automatic PCM tests even when codes are set! Incorporated in the class are tips on reading track diagrams.

**2) Part II Keyless Ignition Systems for Ford & GM**

**Tuesday July 22, 2014**

Keyless Ignition Systems use many modules and components during the process of starting a vehicle. We'll discuss theory, operation & diagnosis of Ford & GM. Although scan tool data is an important key to diagnosing these systems, it can be tough to interpret but we will show you how. We'll provide you with several great diagnostic clues that will help you make good diagnostic decisions. We have diagnosed these systems and have information and techniques to make you successful.

**3) Part III Chrysler New Technologies for Engine Mgmt Systems**

**Tuesday September 23, 2014**

Class description will be available soon.

**4) Part II Essential Diagnostic Techniques By Eric Ziegler**

**Tuesday November 25, 2014**

This class covers 1<sup>st</sup> & essential diagnostic steps to help solve network communication issues, suspected mechanical problems, as well as fuel trim issues. For each type of problem we'll present a logical and proven routine to identify the problem and includes why, how and where specific tests are performed. See what your results have to be and what to do next.

**5) Domestic Vehicle Low Speed Bus Diagnostic Strategies**

**Tuesday January 20, 2015**

Class description will be available soon.

**6) Part III Asian Vehicle Diagnostic Strategies**

**Tuesday March 24, 2015**

Learn seven different diagnostic strategies for each of 7 types of driveability problems. Service information for Asian vehicles does not always offer easy to use diagnostic strategies. But we do, and they work. We'll cover what is the best test, where to do the test and how to do the test and what your test results must be. Get useful specs you need to make your job easier. This is a really practical class.

**Two ways to sign up.... purchase at \$100.00 or \$120.00 each.**

**1. Save \$120 by signing up for all 6 seminars.**

Billed in six payments of \$100.00

Yes, I am interested in purchasing the “Top Technician Training”  
Package for #  technicians.

**2. Sign up for selected seminars of your choice for \$120.00 each.**

I will attend some of the “Top Technician Training” seminars as  
they become available. (please circle your choices)
